SUMMARY

Full Stack Developer with 2+ years of experience building high-performance, scalable web applications. Proven track record of optimizing application performance by 35%. Expertise in modern JavaScript frameworks (React, Next.js), backend systems (Node.js, FastAPI), and cloud infrastructure (AWS, CI/CD). Strong focus on delivering measurable impact through clean code, debugging skills, and collaborative problem-solving in Agile environments.

EXPERIENCE

Software Engineer

MANDS Consulting

Oct 2023 – Present

Noida, UP

- Architected and deployed scalable React and Next.js applications with SSR/SSG, reducing initial page load time by 35% through code splitting, lazy loading, and image optimization techniques.
- Engineered RESTful APIs with Node.js, Express.js, and FastAPI, implementing JWT authentication and serving 10K+ daily requests with 99.9% uptime.
- Enhanced application security by implementing rate-limiting, input sanitization, and RBAC, reducing vulnerability exposure by 25%.
- Established CI/CD pipelines using GitHub Actions and Docker, automating deployment workflows and reducing release cycle time by 40% while collaborating in Agile/Scrum environment to maintain 95% sprint completion rate.

PROJECTS

Braided – AI Chat Application | Next.js, TypeScript, WebSockets, Redux, Tailwind

2025

- Built real-time chat interface with WebSockets and server-sent events, implementing message streaming, typing indicators, and auto-scroll for enhanced UX.
- Integrated TanStack Query for efficient server-state management, implementing caching, background refetching, and stale-time strategies to minimize redundant API calls and improve application responsiveness.
- Engineered a Redux Toolkit state management architecture with persistent storage, enabling multi-session handling and chat history retrieval; cut average resolution time by 15% and boosted agent efficiency.
- Optimized rendering performance through virtualization and debounced input, handling 1000+ messages without lag while ensuring cross-browser compatibility and mobile-first responsive design.

ONESPOT – Video Upload & Management Platform | FastAPI, AWS S3, PostgreSQL

2025

- Developed full-stack video management platform with chunked file uploads, progress tracking, and real-time notifications using AWS S3 for storage.
- Implemented backend microservices architecture with FastAPI handling video metadata, user authentication, and access control for 1000+ users.
- Enhanced application security by implementing secure authentication flows and comprehensive validation, leading to a 15% reduction in session drop-offs.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux, TanStack Query, Tailwind CSS, Material-UI, Responsive Design

Backend: FastAPI, Django, Node.js, Express.js, REST APIs, WebSockets, Microservices, JWT

Databases: PostgreSQL, MongoDB, SQL Server, Query Optimization, Database Design

Cloud & DevOps: AWS (S3, EC2), Docker, GitHub Actions, CI/CD, Vercel, Netlify, Uvicorn

Tools & Testing: Git, GitHub, Jest, React Testing Library, Postman, Swagger, Chrome DevTools, Agile/Scrum

EDUCATION

Maharishi Markandeshwar Institute of Technology

Bachelor of Computer Science, Major in Software Engineering

Ambala, Haryana

Graduated: June 2023

CERTIFICATIONS & ACHIEVEMENTS

- Completed hands on training in full stack development, covering modern JavaScript frameworks, backend development, database management, and deployment workflows
- Built and deployed multiple end to end web applications, handling both frontend and backend development
- Improved application performance through optimization techniques such as code splitting, efficient API handling
